Covid-19 Guidance for Pink Rose Home Service for Finger Lakes and Central NY Regions

Effective 5/19/21 per NYS and the US CDC guidance, all vaccinated residents need to no longer wear masks indoors or outdoors except in designated area, therefore all Pink Rose Home Service employees are to follow the following guidelines to minimize the spread of COVID -19:

All employees who are fully vaccinated are no longer required to wear facial coverings/masks inside our facilities and in customer/supplier locations unless requested to by a property owner or a facility manager. All vaccinated employees should carry their vaccination cards should proof of vaccination be requested.

All non-vaccinated employees must continue to wear a facial covering/mask indoors and/or maintain a distance of 6' from others. They are no longer required to wear a facial covering/mask outdoors unless requested to by a property owner or a facility manager.

Replace exiting posted sign at office entrance with a posted sign stating:

“Only individuals **non-vaccinated** for COVID are required to wear facial coverings/masks for entry”

All Employees (vaccinated and non-vaccinated) are to follow the following health screening guidelines

- 1) Contact dispatch if you have been in close contact for more than 10 minutes with anyone who has tested positive for Covid-19 and is currently positive.
- 2) Contact dispatch if you or any member in your household exhibits any symptoms of Covid-19.
- 3) Contact dispatch if you have been directed by an authorized NYS contact tracer to take a Covid-19 viral test.

If any of the above (1-3) occurs you will be directed to not work. You must set up an appointment to take a Covid-19 viral test at one of the facilities in Monroe, Onondaga or a county in which you reside. You will be allowed to return to work only if you receive a negative test result. You must follow the county health organization guidelines for quarantine and contact tracing if you test positive. You will be allowed to return to work only when advised by your county health organization. Employees are “NO” longer required to text dispatch **SAFE** every day by 8AM.

PRHS employees are responsible to follow personal required actions outlined herein when working. Everyone should continue to hand sanitize regularly.

I urge all employees to get vaccinated, and if it’s during workday hours we will continue to pay you your base rate.
